

A photograph of a wooden walkway with a cable railing system, set in a park-like environment with many trees. The railing consists of a wooden handrail and several horizontal stainless steel cables supported by black metal posts.

YOUR SOURCE FOR DOMESTIC MELT PROJECTS

Domestic melt steel is produced through melting and manufacturing processes conducted entirely within the United States and is often a compliance requirement for government and defense projects.

- **Federal, state, and municipal projects:** Full certifications and required documentation are available to demonstrate compliance.
- **Build America, Buy America Act (BABA):** Products qualify under applicable domestic content requirements.
- **U.S.-based manufacturing:** Manufacturing and machining operations are conducted at our facility in New Holland, PA.
- **Domestic material availability:** Domestic bar stock is currently in inventory.
- **Proven domestic supply:** Supporting domestically sourced projects since 1998.
- **Domestic melt product scope:** Most machined swaged fittings are available in domestic melt. Please contact your sales representative for a complete product list and project-specific support.
